IV International Scientific and Practical Seminar DIGITIZED HERITAGE: PRESERVATION, ACCESS, REPRESENTATION

Subject:

**Software for Digitalization and Representation of
Historical and Cultural Content**

The First International Festival of Digitized Heritage Content DIGITALLY-FEST-2016

November 24-25, 2016

State Polytechnic Museum (at NTUU "KPI") will hold the annual scientific and practical seminar, the fourth in a series of informational and training events on the subject of digitizing of historical, cultural and scientific heritage stored in archives, museums, libraries and private collections, and the first festival of digitized content.

The objective of these events is to familiarize professionals with advanced international practices and technologies of digitizing, digitized content creation, formation and integration of digital collections, distribution, use and access methods.

The format: lectures, presentations, master classes, trainings, anti-conference: professional dialogues and consultations, discussions to find appropriate technological solutions, as well as demonstrations and displays of online resources and services with content digitized collections.

Moderators and spokespersons are the **highly experienced experts** on digitizing and related areas of information and communication technologies.

Participants are welcome: the experts and the heads of archives, museums, libraries, publishers, the owners of private collections, the scientists and everyone wishing to acquire knowledge and skills in the field of digitizing technologies.

We invite manufacturers of online resources to demonstrate their works on the festival of digitized content

On the forth seminar typical and specialized software solutions that provide digitizing, registration and use technology of digital collections, online representation and visualization of the historical and cultural heritage; software platforms, market conditions and conditions for purchasing of software products; standards that ensure the unification and integration of software and technological solutions to be considered.

On the festival there will be shown modern online representations of the digitized content of Memory Institutions, private and other gatherings, also the advanced experience and successful projects on the presentation of world and national heritage in digital content.

The participants traditionally will be invited to visit a data centre and museum exhibition.

The participants are given the opportunity to continue discussions during a dinner.

On completion the participants will receive the Certificate
